Weight gain, mood swings, fatigue, low desire ...all went away when I balanced this ONE “stress hormone”...

It’s not estrogen or progesterone...

It’s a little hidden hormone that controls both of them. See...

At 49, everyday felt like a nightmare...

I Barely slept...

Woke up exhausted...

Sweat like a pig...

Snapped at my husband for no reason...

Watched my belly blow up like a balloon no matter how much I exercised...

I tried to diet..but I just kept losing and gaining the same 11 pounds...

I tried exercise...but I kept hurting myself

I tried yoga and meditation...but my brain was so frantic I couldn’t sit still.

I tried a bunch of supplements...but all of them were useless, and they gave me a stomach ache.

I felt hopeless.

Until an old friend told me about this “hormone balancing” supplement that can help shift hormonal weight, mood swings, hot flashes, fatigue...all of it.

It's some kind of herbal combination that supports Estrogen and Progesterone levels so the body acts like it’s supposed to.

I didn’t believe her at first...could it really be as easy as taking a little capsule each day?

She spared a bottle for me to try for the next couple of weeks...and omg.

I sleep 6-7 hours a night

I wake up with a ton of energy

I think clearly, I can focus on tasks

I’m a lot less moody (ask my husband!!)

It’s called Hormone Harmony...

And it all comes down to 12 plant extracts that are proven to balance ONE “stress hormone” called cortisol...

Once cortisol is balanced...

Estrogen and progesterone automatically balance out too.

That’s what all my symptoms seemed to just...go away.

It’s not just me...over 1 million women have already experienced the life-changing benefits.

#3 - They leverage the law of "unique numbers" (at least that's what I call it). Notice how they say "12 pounds" and "52" and "56.4%" as those numbers ALL help to make this ad MORE believable as the numbers are more random compared to "10 pounds" or "50" or "60%"
